

Hands-On-Learning: Intelligence Confidence and Enterprise Risk Modelling

Learning Objectives

1. By the end of this activity, learners will be able to:
Compile evidence of IOCs, artifacts and TTPs.
2. Analyze the data and create a report in the proper format and context to the appropriate audience.

Description: Create a 3-Minute "Threat Update" Presentation

Structure of the Activity

Title: Create a 3-minute "Threat Update" presentation.

Tools used:

Scenario

Using evidence obtained from the Module 1 hands-on lab and following the threat analysis techniques and reporting considerations we explored in this module, create a 3-minute threat update presentation.

Objective

Students will use skills from this module to turn data into intelligence and create a brief and impactful report so that management can take action on the analyst's recommendations.

Instructions for learners

Step 1: Define Your Purpose

Ask: What is the most urgent threat or new intelligence I need to communicate?

Choose one of the following angles:

Emerging threat actor or campaign

Significant IOC/tactic targeting your org/sector

Notable CVE or exploit in the wild

Summary of threat trend affecting risk posture

Step 2: Structure the Message

Use this 3-part format:

- 1 What's the Threat? Name, summary, and current activity o Example: "APT29 has launched a new phishing campaign targeting cloud-based authentication."
- 2 Why It Matters: Impact, relevance to your org/sector, urgency o Example: "Targets government cloud accounts. Abuse of MFA fatigue is bypassing normal defenses."
- 3 What To Do: Recommended action(s): detection, mitigation, watchlists, patch, etc. Example: "Monitor for indicators X/Y/Z. Re-evaluate MFA policy and alerting."

Step 3: Gather Supporting Intel

Collect:

1–2 key IOCs (domain, hash, email subject, etc.)

1–2 TTPs (MITRE ATT&CK mapping if possible)

Brief timeline or source (CISA alert, threat feed, sandbox, etc.) Use plain language, avoid jargon, and limit technical detail to what's necessary.

Step 4: Build 2–3 Slides

Slide 1: Threat Summary (Name + 1-2 bullets + visual or logo)

Slide 2: Impact & Action (Risk relevance + Action list)

(Optional) Slide 3: IOC Table or Timeline

Design tips

Bold keywords

Use org branding or familiar slide format

Keep each slide readable in <30 seconds

Step 5: Practice & Time Yourself

Read it aloud to ensure it fits within 3 minutes

Refine for clarity, brevity, and confidence

Anticipate 1 follow-up question

Example Outline

Slide 1: Threat Summary

“Black Basta ransomware targeting U.S. healthcare — June 2025 surge”

RDP & Qakbot initial access

Double extortion: exfil + encryption

Slide 2: Impact & Actions

Relevant: Sector targeting + known infrastructure

Actions:

Watchlist IP: 185.172.128[.]91

Audit exposed RDP

Update detection for TTPs (TA0001, TA0011)

Organize Information Following This Structure for Peer Review

- 1 Title Page:** Project title, your name, date.
- 2 Requirement 1:** Provide details here.
- 3 Requirement 2:** Provide details here.
- 4 Requirement 3:** Provide details here.

Instructions for Documenting and Sharing the Project for Peer Review

1. Document the Project

Use word processing software to create your report.

Insert the diagram, map, screenshot, or image directly into your Word document, if available.

Ensure all sections of the project document structure are completed.

Proofread and edit your report for clarity and accuracy.

2. Share the Project

Save your report and presentation in PDF format.

Upload your documents to the “Peer Review” area in the course shell.

Provide a brief description of your project in the submission post.

3. Peer Review

Review the projects submitted by your peers.

Provide constructive feedback and comments on their work.
