

Non-Graded Project: Threat Actor Campaign Analysis & Intelligence Brief

Learning Objectives

By the end of this activity, learners will be able to:

1. Find and analyze a sample dataset and intelligence snippets to identify key threat actor campaign characteristics.
 2. Assess risk and produce a concise intelligence brief for stakeholders.
-

Description

Threat Actor Campaign Analysis & Intelligence Brief

Structure of the Project

Scenario: Using a sample dataset, compile data, analyze it into actionable intelligence, and create a threat actor campaign analysis and intelligence brief.

Objective

Demonstrate comprehensive understanding of all the skills learned in this course, including investigation techniques, data compilation and analysis, confidence levels and understanding of stakeholder communications.

Follow these steps to do this project

Objective

Students will find and analyze a sample dataset and intelligence snippets to identify key threat actor campaign characteristics, assess risk, and produce a concise intelligence brief for stakeholders.

Setup (Before the session)

Prepare a mock intelligence package including:

- Threat actor profile summary (e.g., group name, known TTPs)
- Indicators of Compromise (IOCs) from recent campaign activity (hashes, IPs, domains)
- Extracts from open-source reporting (social media chatter, blog posts)
- Network traffic snippets or sandbox reports summary
- Intelligence confidence ratings or source reliability info

Instructions

Step 1: Analyze and Correlate

- Review the threat actor profile and recent campaign data.
- Identify patterns, campaign objectives, and infrastructure reuse.
- Correlate IOCs with reported activities and attribution clues.

Step 2: Assess Risk and Confidence

- Evaluate the threat actor's capability and intent based on data.
- Use intelligence confidence language to qualify findings (e.g., high, moderate, low confidence).
- Identify gaps or uncertainties in the analysis.

Step 3: Write an Intelligence Brief

Draft a 1-page stakeholder-oriented intelligence brief that includes:

- Executive summary of the campaign and actor

- Key findings (TTPs, infrastructure, campaign goals)

- Risk assessment and confidence levels

- Recommended mitigations or next steps for stakeholders

Deliverables:

- A written intelligence brief (can be submitted as text or slide)

- Optional: a short verbal briefing (2-3 minutes) summarizing the analysis

Assessment Criteria:

Accuracy and clarity of analysis and correlations

Appropriate use of intelligence confidence language

Quality and conciseness of the briefing tailored to stakeholders

Ability to identify and communicate risk and uncertainty

Organize information following this structure for peer review

- 1 Title Page:** Project title, your name, date.
- 2 Project Requirement 1:** Provide details here.
- 3 Project Requirement 2:** Provide details here.

- 4 Project Requirement 3:** Provide details here.
- 5 Project Requirement 4:** Provide details here.
- 6 Recommendations:** One actionable recommendation.

Instructions for Documenting and Sharing the Project for Peer Review

1. Document the Project

- Use word processing software to create your [objective].
- Ensure all sections of the project document structure are completed.
- Proofread and edit your report for clarity and accuracy.

2. Share the Project

Save your report and presentation in PDF format.

Upload your documents to the “Peer Review” area in the course shell.

Provide a brief description of your project in the submission post.

3. Peer Review

Review the projects submitted by your peers.

Provide constructive feedback and comments on their work.

By completing this project, you will gain valuable insights into market analysis and develop skills that are essential for business strategy and decision-making.
