

Hands-On-Learning: Threat Update Presentation

Learning Objectives

By the end of this activity, learners will be able to do:

1. Synthesize and communicate critical threat intelligence for a specific audience.
2. Create a professional threat update that maintains appropriate confidence levels and offers actionable recommendations.

Description: Preparing a Threat Update Presentation specified for context and audience.

Structure of the Activity

Title: Threat Update Presentation

Tools used: MS Word, PowerPoint

Scenario

Using the intelligence you created in the hands-on lab for module 3, create a threat update presentation as specified below.

Objective

Students will synthesize their learning from previous modules to identify, analyze, and communicate critical threat intelligence in a format suitable for executive and strategic audiences.

Instructions for learners

This laboratory exercise challenges students to demonstrate their comprehensive threat intelligence skills through the creation of a professional stakeholder presentation. Students will synthesize their learning from previous modules to identify, analyze, and communicate critical threat intelligence in a format suitable for executive and strategic audiences. The lab requires students to demonstrate competency in threat identification, risk assessment, confidence communication, and actionable

recommendation development. Students will create professional-quality presentations that effectively communicate complex threat intelligence findings while maintaining appropriate confidence levels and avoiding analytical pitfalls. Through this exercise, students will demonstrate their ability to integrate technical threat intelligence skills with strategic communication capabilities, producing intelligence products that drive organizational decision-making and enhance cybersecurity posture.

Organize Information Following This Structure for Peer Review

- 1 Title Page:** Project title, your name, date.
- 2 Requirement 1:** Provide details here.
- 3 Requirement 2:** Provide details here.
- 4 Requirement 3:** Provide details here.

Instructions for Documenting and Sharing the Project for Peer Review

1. Document the Project

Use word processing software to create your report.

Insert the diagram, map, screenshot, or image directly into your Word document, if available.

Ensure all sections of the project document structure are completed.

Proofread and edit your report for clarity and accuracy.

2. Share the Project

Save your report and presentation in PDF format.

Upload your documents to the “Peer Review” area in the course shell.

Provide a brief description of your project in the submission post.

3. Peer Review

Review the projects submitted by your peers.

Provide constructive feedback and comments on their work.
